## Antiviral plexi glass shields

The shield prevents infection by air/droplet-borne diseases. It enables direct contact with the client minimizing the risk of danger. It can be attached to the counter or desk permanently or by means of clamp holders.

### Shields are made of:

- frame: anodized aluminum or powder-varnished profile
- filling: plexi glass (polycarbonate) 4 mm thick

### Configurations:

- 1) front panel with removable side panel
- 2) front panel

### Dimensions:

overall height: 700 mm  
plexi glass height: 550 mm

HPX-01B (70), HPX-01U (70)

width: 725 mm

HPX-01B (70-30)

width: 735 mm

side panel width: 385 mm

\* It is possible to modify the product according to the individual customers' needs.
